

# Connection with **IoT**, Safety life with **ICT**

**Work enhancement**

Using PAN without public network

In tunnel, or in large-scale disaster

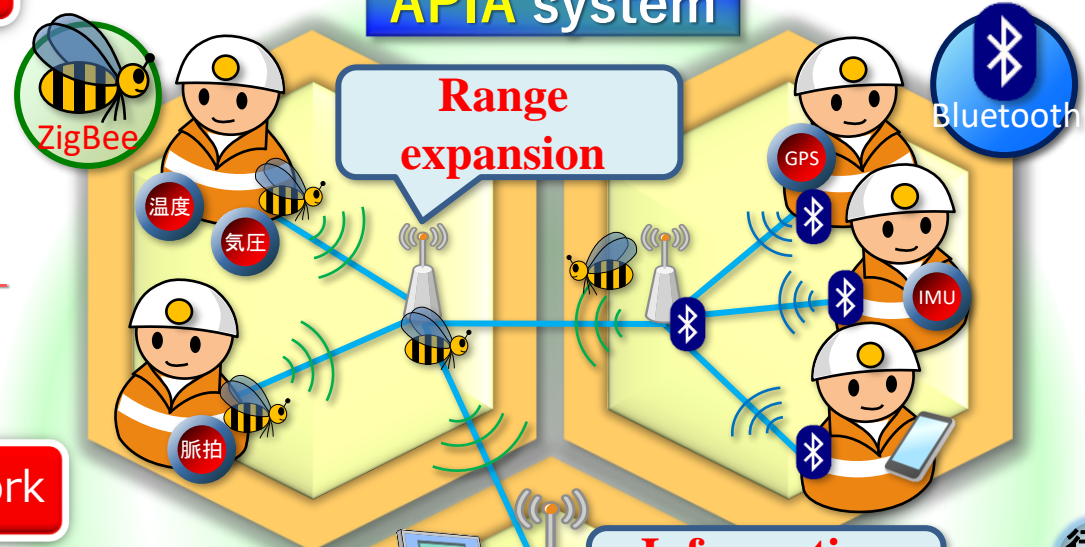

## Remote Monitoring System

### APIA system

**Safety**

Members position on MAP

Information about members' position, action, situation, and environment using multi-sensors

**ZigBee network**

**Point 1 Mesh topology network**

**Point 2 Multi hop communication**

**Point 3 Low cost, power saving**

**Information gathering**

Rescue Support System
